A feature of the Amherst College com-mencement will be the presentation to Prof. Charles E. Garman of a volume of "Stud-ies in Philosophy and Psychology." publish-ed by thirteen of his former students who have been engaged in teaching or writing in these lines since graduation. The volume commemorates Prof. Garman's twenty-fifth commemorates Prof. Garman's twenty-nith year as teacher of philosophy at Amherst. This form of tribute has not been so common in this country as in Germany, where such a Festschrift is regarded as the highest tribute that can be paid a scholar by his colleagues and former pupils. The thirteen contributions come from almost as many colleges and universities including many colleges and universities, including Brown, Columbia, Smith, Cornell, Chicago, Brown, Columbia, Smith, Cornell, Chicago, Washington, Western Reserve and Wisconsin. Some appeal primarily to the specialist, but others, notably those of Prof. Wilcox on the Expansion of Europe, Prof. Pierce on the Subconscious, and of R. A. Woods of South End House, Boston, on Democracy, are of interest to the general reader also. The new "pragmatic" ment is represented in several articles. The volume is edited by Profs. Tufts, Delabarre, Sharp, Pierce and Woodbridge.

Prof. Cattell, in an article on the college training of American psychologists, has re-cently called attention to the existence of some agency at Amherst which "makes psychologists." Amherst men know that the teaching of Prof. Garman has been adapted not only to interest the student in adapted not only to interest the student in the more specific problems of philosophy and psychology, but also to awaken him to the meaning and work of life in its broad-est and deepest phases. When thoughtful observers like Charles Francis Adams are calling attention to the unfortunate results of great numbers, when so many instructors are tempted to neglect students for the sake f research, it is encouraging that at Amherst is a man who gives himself so un-paringly and effectively to the work of the
